What has been the highest temperature in the whole world?	56.7C (134F), Death Valley, California, in 1913
What is the record high temperature for Chicago?	104F (40C)
What is the record low temperature for Chicago?	-27F (-33C)
What is the name of the big river in the center of the US?	Mississippi River
Which is the richest state?	New Hampshire
Which is the poorest state?	Mississippi
Where is the Grand Canyon?	Arizona
Where is Yellowstone National Park?	Wyoming, Montana, Idaho
Where is Glacier Bay National Park?	Alaska
Where is Glacier National Park?	Montana

### "which" vs. "what"

"Which" is more formal when asking a question that requires a choice between a number of items. You can use "What" if you want, though.

Generally speaking, you can replace the usage of "which" with "what" and be OK grammatically. It doesn't always work the other way around, however. There needs to be a context of choice. For example:

*Which/What flavor of ice cream do you want?*

- Either is fine, but "which" is better.

*Which/What do you want for dessert?*

- "Which" only works in the context of being presented with choices (e.g. a dessert cart right in front of you).

<b>Animals</b>	<b>Plants</b>	<b>Physical</b>
alce - moose	arbol - tree	agua - water
anémona - anemone	bosque - forest	amanacer - sunrise
antílope - antelope	cactus - cactus	arco - arch
ardilla - squirrel	césped - grass	arco iris - rainbow
